FORM SD

SPECIALIZED DISCLOSURE REPORT

Conflict Minerals Report

Liberty Interactive Corporation has included this Conflict Minerals Report as an exhibit to its Form SD for 2015 as required by Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD (collectively, the "Conflict Minerals Rule"). The date of filing of this Conflict Minerals Report is May 31, 2016.

Unless the context indicates otherwise, the terms "we," "its," "our" and "our" refer to Liberty Interactive Corporation and its consolidated subsidiaries. As used herein, "3TG" is tantalum, tin, tungsten and gold, without regard to the location of origin of the minerals or derivative metals.

Forward-Looking Statements

This document contains forward-looking statements within the meaning of the federal securities laws. Any statements that do not relate to historical or current facts or matters are forward-looking statements. You can identify some of the forward-looking statements by the use of forward-looking words, such as "intend" and the like, or the use of future tense. Statements concerning current conditions may also be forward-looking if they imply a continuation of current conditions. Examples of forward-looking statements include, but are not limited to, statements concerning the additional steps that we intend to take to mitigate the risk that our necessary 3TG finances or benefits armed groups.

Forward-looking statements are subject to risks and uncertainties that could cause actual actions or performance to differ materially from those expressed in the forward-looking statements. These risks and uncertainties include, but are not limited to, (1) the continued implementation of satisfactory traceability and other compliance measures by our direct and indirect suppliers on a timely basis or at all, (2) the accuracy and reliability of the information we receive and (3) political, legal and regulatory developments, whether in the Democratic Republic of the Congo and adjoining countries (the "DRC Region"), the United States or elsewhere. The term "adjoining countries" has the meaning contained in the Conflict Minerals Rule. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of filing of this document. We do not intend, and undertake no obligation, to publish revised forward-looking statements to reflect events or circumstances after the date of filing of this document or to reflect the occurrence of unanticipated events.

Applicability of the Conflict Minerals Rule to Our Company

We own interests in subsidiaries that are not manufacturers or suppliers of products. We are required to make a filing pursuant to the Conflict Minerals Rule because some of our consolidated subsidiaries contract to manufacture products where 3TG is necessary to the functionality or production of such products.

Our consolidated subsidiaries activities are not in-scope for purposes of the Conflict Minerals Rule. Only our consolidated subsidiaries QVC, Inc. and Bodybuilding.com, LLC, and our former consolidated subsidiary, Backcountry.com, Inc. (n/k/a Backcountry.com, LLC), had in-scope

0

product for purposes of the Conflict Minerals Rule in 2015. Our consolidated subsidiaries do not manufacture any products, and they do not contract to manufacture the Co. (n/y

The Suppliers identified 58 smelters and refiners as having processed the necessary 3TG contained in the products covered by this Conflict Minerals Report, as further discussed under "Product Information; Smelter and Refiner and Country of Origin Information."

Pursuant to the Conflict Minerals Rule, based on the results of our reasonable country of origin inquiry, we were required to conduct due diligence for 2015 with respect to the 3TG in our in-scope products. These due diligence efforts are discussed below.

For our reasonable country of origin inquiry, to the extent applicable, we utilized the same processes and procedures as for our due diligence.

None of our in-scope products were determined by us to contain necessary 3TG that directly or indirectly financed or benefitted armed groups in the DRC Region. However, ~~we did not determine if our in-scope products 3TG were DRC conflict free.~~ "DRC conflict free." The terms "armed group" and "DRC conflict free" have the meanings contained in the Conflict Minerals Rule.

Due Diligence Program Design

r r

We designed our due diligence measures relating to 3TG to conform with, in all material respects, the criteria set forth in the Organisation for Economic Co-operation and Development's (the "OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, as supplemented by the Supplement on Tin, Tantalum and Tungsten and the Supplement on Gold (Second Edition 2013) (collectively, the "OECD Guidance").

Design r r

~~The OECD Guidance provides a five-step framework for due diligence as a basis for responsible global supply chain management of minerals from conflict-affected and high-risk areas. The OECD Guidance is used as a basis for our due diligence efforts. However, these are not used as a basis for our due diligence efforts.~~

We intend to take the following additional steps on in-scope products for 2016 to mitigate the risk that the 3TG contained in and necessary to the products we contract to manufacture finance or benefit armed groups in the DRC Region:

1. Encourage Suppliers that provided company level information for 2015 to provide product level information for 2016 through ongoing outreach with these Suppliers.

10

2. Engage with Suppliers that provided incomplete responses or that did not provide responses for 2015 to help ensure that they provide requested information for 2016.
3. Monitor and encourage the continuing development and progress of traceability measures of Suppliers that indicated for 2015 that the source of 3TG was unknown or undeterminable.
4. Communicate to new potentially in-scope suppliers our expectations with respect to 3TG, including through the dissemination of the Conflict Minerals Policy to them. In addition, as new in-scope suppliers are added, work with these suppliers to ensure that they understand the requirements of the Conflict Minerals Rule and the OECD Guidance.
5. Continue to refine our 3TG risk management strategy based on the results of our due diligence on products we contracted to manufacture in 2015.
6. Pursuant to our risk management strategy, management may determine to remove certain non-responsive Suppliers from our supply chain on a going-forward basis.

All of the foregoing steps are in addition to the steps that we took with respect to in-scope products for 2015, which we intend to continue to take with respect to in-scope products for 2016 to the extent applicable.
